

An All-In-One Solution For **Payment Card Processing** Made Simple

An Easier Way to Process Payments

- With over 100 years of combined payment processing experience ALON provides one-stop payment processing services for all major credit cards, PIN-based debit cards, fleet cards, gift and loyalty cards.
- We offer experienced in-house point of sale & automated fuel dispenser technical support and customer service teams.
- Future-proof payment processing systems developed by the industry's most recognized names.
- Find out how we can help future-proof your payments with our EMV enabled and mobile wallet ready point of sale options.
- We understand the challenges that c-stores face and we're here to help make what you do a little easier.

Innovative Features

Daily Electronic Statements

- ALON delivers our merchants daily “credit memos” of their card transactions online or via fax instead of by regular postal mail.
- By receiving your credit memos daily, you know exactly what your costs are for each card type.
- Our credit memos are easy to read and provide your business with keen insight into your transaction processing habits.
- Benefits of Electronic Statements:
 - Reduce the risk of lost or stolen personal information through mail
 - Instantly view all of your transaction costs the next business day
 - Receive your credit memos faster than standard paper mailing
 - No hidden transaction fees or confusing line items

EMV Ready

- The nationwide shift to EMV or “chip cards” is well underway and ALON is preparing to process your customers chip enabled cards.
- Fewer transaction prompts to eliminate confusion for your customers.
- Eliminate lines with faster transaction speeds.
- Protect your business from counterfeit cards running on old magnetic stripe technology.
- Increased security with our PCI-DSS validated processing network.
- Benefits of ALON EMV:
 - Eliminate counterfeit chargebacks
 - Increase consumer confidence and provide safer transactions for your customers
 - Avoid the liability shift

Mobile Wallet Acceptance

- Our Future Proof all-in-one POS system is designed to meet your businesses needs not only today, but far into the future.
- Our state of the art equipment allows a two-way communication between any NFC (Near Field Communication) capable device, or sometimes called a Mobile Wallet Reader.
- What does that mean to your business? Our terminals will fully support mobile wallets stored in your customer’s smartphone.
- Your customers can simply wave their phone in front of the terminal to transmit an NFC credit card transaction. No card swipe is needed.
- Benefits of Mobile Wallets acceptance:
 - No expensive equipment upgrades.
 - Instantly accept Apple Pay, Google Pay, Samsung Pay, or any other mobile wallets on the market.
 - No additional monthly costs, or transaction fees to process.
 - Speed up checkout with faster transaction times.
